SET- D

1. _____ of the American Psychological Association represents Health Psychology
   A. Division 16
   B. Division 38
   C. Division 47
   D. Division 98

2. Which of the options below is an example of a stereotype?
   A. Studies show that women are less often hired than men when interviewed for jobs
   B. Rajiv has an opinion that women are emotional people
   C. Anita dislikes men
   D. John thinks that Sara is childish

3. The correct sequence of emergence of the following theories of emotion:
   A. James-Lange, Cannon-Bard, Schachter-Singer
   B. Cannon-Bard, James-Lange,Schachter-Singer
   C. James-Lange, Schachter-Singer, Cannon-Bard
   D. Cannon-Bard, Schachter-Singer, James-Lange

4. A significant negative correlation is found between variables X and Y when:
   A. X causes Y
   B. Y causes Y
   C. As X increases, Y increases
   D. As X increases, Y decreases

5. _____ involves a research partici[illegible]

7. Aversion is one of the conditioning procedures used in:
   A. Psychoanalytic therapy
   B. Behaviour therapy
   C. Rogerian therapy
   D. None of the above

8. In a _____ experiment, neither researchers nor participants are aware of who is in the experimental or control group
   A. double blind
   B. peer reviewed
   C. single blind
   D. generalizable

9. Abraham Maslow and Carl Rogers were the proponents of _____ approach
   A. Cognitive approach
   B. Behavioural approach
   C. Humanistic approach
   D. Existential approach

10. External validity of an experiment refers to
   A. Results that are replicable
   B. Results that are generalizable to other populations
   C. Results obtained from cross cultural studies
   D. Results from laboratory experiments

11. Perceptual constancies are
   A. An aid in perceiving a stable and consistent world
   B. Likely inborn and not subject to learning
   C. Illusion in which we perceive something that does not correspond to the sensory information
   D. Help an individual determine cause and effect relations

12. Groupthink occurs when group members desire
   A. Harmony
   B. Power
   C. Freedom
   D. Control

Scanned by CamScanner

13. Milgram's experiments were on:
A. Conformity
B. Compliance
C. Prejudice
D. Obedience

14. Natural concepts are based on:
A. A set of rules or properties
B. Propositions
C. Prototypes
D. Schemas

15. The effect of previous learning on retention of later learning is
A. Forgetting
B. Retroactive
C. Proactive
D. Relearning

16. Type II error is a statistical term used when
A. When null hypothesis is actually false but accepted
B. When null hypothesis is actually true but rejected
C. When null hypothesis is actually true but accepted
D. None of the above

17. A researcher is estimating _____ when obtaining two sets of scores from a group of participants on a test at two different time periods
A. Internal consistency reliability
B. Test-retest reliability
C. Split-half reliability
D. Cronbach's reliability

18. The correct sequence of events for the Atkinson and Shiffrin model of human memory is:
A. sensory memory - short term memory - attention - rehearsal - long term memory
B. attention - sensory memory - short term memory - long-term memory - rehearsal
C. attention- short term memory - sensory memory - long term memory - rehearsal
D. sensory memory - attention - short term memory - rehearsal - long term memory

Scanned by CamScanner

19. Social loafing occurs when
A. when the expectation of a reciprocal gesture is low
B. only when the task requires physical effort
C. when people choose or are required to work alone
D. when individual contributions to the group effort are anonymous

20. Ebbinghaus pioneered experiments on:
A. Memory
B. Emotion
C. Thinking
D. Perception

21. Intelligence can be defined as
A. Ability to get good grades in school
B. All the factors that make a person different from another
C. Knowledge of many facts
D. The ability to think abstractly and learn from experience

22. When people feel relatively positive about groups that live nearby demonstrates the effects of:
A. Social categorization
B. Suppression of stereotypes
C. Intergroup contact
D. Social differentiation

23. Health for the bio-psychosocial model is
A. a state of complete physical, mental and social wellbeing
B. the presence of pathogen in the body
C. absence of disease
D. none of the above

24. Triarchic theory of intelligence was propounded by
A. Sternberg
B. Guildford
C. Thurstone
D. Gardner

25. Which of the following is not a cue for depth perception?
A. Linear perspective
B. Interposition
C. Orientation
D. Texture

Scanned by CamScanner

5

26. _____ as a measure of central tendency is preferred if there are extreme scores in the data
A. Mode
B. Median
C. Mean
D. None of the above

27. t-test was given by
A. William Gossett
B. Cattell
C. Fisher
D. Trestorick

28. The cognitive dissonance theory was propounded by
A. Festinger
B. Asch
C. Bem
D. Bandura

29. Which of the following are the three stages of the General Adaptation Syndrome?
A. denial, resistance and resignation
B. appraisal, adjustment and acceptance
C. alarm, resistance, and exhaustion
D. avoidance, approach, and acceptance

30. Learning in one situation that influences learning in another situation is evidence of
A. Learned helplessness
B. Avoidance learning
C. Transfer of training
D. Escape learning

31. To get the F-value, the Mean sum of square (Between) has to be divided by
A. Pearson correlations
B. Spearman Rho
C. Error
D. None of the above

Scanned by CamScanner

32. In a normal distribution approximately what percentage of cases fall within plus and minus one SD?
A. 32%
B. 100%
C. 98%
D. 68%

33. The process of detecting, translating and transmitting from the external environment to the brain is:
A. Selective attention
B. Perception
C. Sensation
D. Adaptation

34. The medical name for myocardial infraction is
A. Angina
B. Stroke
C. Heart attack
D. None of the above

35. If a person is physically attractive, we expect them to also have other positive characteristics. This is called the
A. Good person effect
B. Angel effect
C. Attraction effect
D. Halo effect

36. In research, informed consent includes which of the following:
A. A description of the nature and procedures of the research
B. The duration of the study
C. Details and purpose of the research
D. All of the above

37. Cumulative frequency curve is known as _____
A. Ogive
B. Bar diagram
C. Histogram
D. Frequency polygon

Scanned by CamScanner

38. Social behaviour and thoughts are influenced in certain ways by factors called
A. Confounding variables
B. Dependent variables
C. Mediating variables
D. Independent variables

39. The James- Lange theory of emotion states that:
A. one feels emotions and then a bodily reaction results
B. emotions and visceral reactions simultaneously occur
C. one reacts with one's body first and then one feels emotions
D. the somatic nervous system is the seat of emotion

40. In programmed learning, importance is placed on:
A. Trial and error learning
B. Operant conditioning
C. Latent learning
D. Classical conditioning

41. Analysis of variance is a statistical method of comparing the _____ of several populations
A. Means
B. Standard deviations
C. Proportions
D. Variances

42. Which of the following is a measure of Spread?
A. Variance
B. Mean
C. Mode
D. p value

43. According to Piaget, children are able to grasp the concept of object permanence in:
A. Sensori-motor stage
B. Concrete operational stage
C. Pre-operational stage
D. Formal operations stage

Scanned by CamScanner

44. The matching hypothesis suggests that people select their partners who
   A. is rated as physically attractive
   B. is similar in attractiveness to themselves
   C. is similar in personality to themselves
   D. Both B and C

45. Optical illusion result from distortion in:
   A. Perception
   B. Sensation
   C. Transduction
   D. Adaptation

46. _____ is a probability type of sampling technique
   A. Stratified random sampling
   B. Purposive sampling
   C. Convenience sampling
   D. Snowball sampling

47. Skewness in the context of normal probability is referred to as:
   A. Kurtosis
   B. Asymmetry of distribution
   C. Height of the ordinate that divides p and q
   D. Peakedness

48. A typical representation of an object or event that is learned that exemplifies the features of a category is:
   A. prototype
   B. memory trace
   C. perceptual constancy
   D. cognitive map

49. _____ is the degree to which findings can be applied to other people, situations or events.
   A. reliability
   B. generalizability
   C. validity
   D. objectivity

Scanned by CamScanner

50. The social exchange theory of relationships suggest that rewards are
A. Minimized
B. Reinforcing
C. Set against costs -
D. Unimportant

51. The Central Nervous System comprise
A. Peripheral nervous system
B. Brain and spinal cord
C. Autonomic nervous system
D. Somatic nervous system

52. The 23rd Chief Election Commissioner of India is
A. O.P. Rawat
B. Sunil Arora
C. Rajiv Jain
D. Anil Dhasmana

53. The most polluted megacity in the world by the World Health Organization is
A. Hong Kong
B. Cairo
C. Delhi
D. Beijing

54. Which State published the first draft of the National Register of Citizens (NRC)?
A. Meghalaya
B. Tripura
C. Arunachal Pradesh
D. Assam

55. Job satisfaction has been _____ related to absenteeism and turnover
A. Directly
B. Positively
C. Negatively
D. Elastically

Scanned by CamScanner

56. _____ was the proponent of Individual Psychology
A. Horney
B. Jung
C. Adler
D. Erikson

57. _____ is known as good cholesterol
A. LDL
B. FDL
C. HDL
D. CDL

58. _____ is a negative symptom of schizophrenia
A. Hallucinations
B. Delusions
C. Social withdrawal
D. Thought disorders

59. The _____ leadership style is an expression of the leader's trust in the abilities of his or her subordinates
A. Delegative
B. Participative
C. Authoritarian
D. All of the above

60. The Signature Bridge is in which city of India
A. Mumbai
B. Kolkata
C. Chennai
D. Delhi

61. The world's coldest village Oymyakon which records -62^0C is located in
A. Norway
B. Japan
C. Iceland
D. Russia

Scanned by CamScanner

62. Beck's cognitive triad comprise
A. Negative beliefs about self, others and future
B. Negative beliefs about self, world and future
C. Negative beliefs about self, world and others
D. Negative beliefs about present, past and future

63. DSM 5 update of the Diagnostic and Statistical Manual of Mental Disorders was published in
A. 2009
B. 2012
C. 2013
D. 2015

64. The height of the Statue of Unity is
A. 178 meters
B. 182 meters
C. 185 meters
D. 188 meters

65. Which movie won the Best Picture in the Oscar Awards 2019?
A. Green Book
B. Bohemian Rhapsody
C. Roma
D. A Star is Born

66. The Hawthorne experiment was conducted by
A. Elton Mayo
B. William Gilbreth
C. F.W. Taylor
D. Hendry Fayol

67. The correct sequence of events are
A. Release of neurotransmitters; post-synaptic potential; binding on receptor sites; synthesis of neurotransmitters
B. Post-synaptic potential;synthesis of neurotransmitters;release of neurotransmitters;binding on receptor sites
C. Synthesis of neurotransmitters;binding on receptor sites;post-synaptic potential;release of neurotransmitters
D. Synthesis of neurotransmitters; release of neurotransmitters; binding on receptor sites;post-synaptic potential

Scanned by CamScanner

68. Gate Control Theory explains the phenomena of
A. Pain
B. Psycho immunology
C. Cardiac arrest
D. None of the above

69. The total number of medals won by India in the 2018 Commonwealth Games was
A. 68
B. 66
C. 62
D. 58

70. India's longest rail-road bridge "Bogibeel bridge" is inaugurated in which state?
A. Arunachal Pradesh
B. Odisha
C. Assam
D. West Bengal

71. Inferiority complex was suggested by
A. Carl Jung
B. Harry Stack Sullivan
C. Erik Erikson
D. Alfred Adler

72. The Chief Minister of Madhya Pradesh is
A. Shivraj Singh Chouhan
B. Kamal Nath
C. Jyotiraditya Scindia
D. Ashok Gehlot

73. The President of _____ was the Chief Guest at the 2019 Republic Day
A. Indonesia
B. Philippines
C. South Africa
D. France

Scanned by CamScanner

. The _____ explains internal processes of choice among different behaviours

A. Goal attainment theory
B. Equity theory
C. Expectancy theory
D. Goal setting theory

5. When mental disorders are long in duration, they are known as

A. Seasonal
B. Acute
C. Chronic
D. Prolonged

76. During periods of prolonged stress, the hypothalamus triggers

A. ACTH hormone
B. Sympathetic nervous system
C. Pituitary gland
D. Adrenal gland

77. Light passes through the eye in which of the following sequence?

A. Cornea, lens, pupil, retina
B. Cornea, pupil, lens, retina
C. Pupil, cornea, lens, retina
D. Lens, cornea, pupil, retina

78. Symptoms of dyslexia relate to

A. Problems in communication
B. Specific problems with reading
C. Impairment of language processing
D. Stuttering and stammering

79. _____ won the Best Actor Award in the 2018 Filmfare Awards

A. Aamir Khan
B. Nawazuddin Siddiqui
C. Akshay Kumar
D. Irrfan Khan

Scanned by CamScanner

80. _____ won the FIFA World Cup 2018, Russia
A. France
B. Croatia
C. England
D. Belgium

81. Co-morbidity means that
A. a person has two or more disorders
B. a person is unlikely to recover from the disorder
C. a person has a more severe form of a disorder
D. a disorder that is mild and treatable

82. A concept in the humanistic-existential approach is
A. Rational thought
B. Unconditional positive regard
C. Transference
D. Modeling

83. _____ has been awarded with the 2018 Jnanpith Award
A. Arundhati Roy
B. Aravind Adiga
C. Anita Desai
D. Amitav Ghosh

84. National Girl Child Day is observed on
A. 18 January
B. 24 January
C. 27 January
D. 30 January

85. A woman reflects her anger from her husband onto her child is an example of:
A. Projection
B. Reaction formation
C. Sublimation
D. Displacement

86. The primary olfactory cortex lies in the _____ lobe of the cerebral cortex
A. Temporal lobe
B. Parietal lobe
C. Occipital lobe
D. Frontal lobe

Scanned by CamScanner

87. The release of _____ reduces the effectiveness of the immune system in response to prolong stress
A. Dopamine
B. Corticosteroids
C. Endorphins
D. Catecholamines

88. In cases of Obsessive Compulsive Disorder (OCD), _____ are always seen
A. Irrational impulses
B. Forbidden wishes
C. Hallucinations
D. Delusions

89. _____ became the first Indian woman IAF officer to fly a fighter aircraft solo
A. Punita Arora
B. Harita Kaur Deol
C. Padmavathy Bandopadhyay
D. Avani Chaturvedi

90. The Indian Premier League (IPL) 2018 trophy was won by the
A. Kolkata Knight Riders
B. Royal Challengers Bangalore
C. Chennai Super Kings
D. Delhi Dare Devils

91. Forbes' Magazine ranked _____ as the most powerful man for 2018
A. Donald Trump
B. Narendra Modi
C. Vladimir Putin
D. Xi Jinping

92. The _____ framework is based on the expectancy, demand and incentive concepts
A. Behavioural
B. Cognitive
C. Social learning
D. Supportive

93. The _____ part of the nervous system is active under the emotional state
A. Sympathetic
B. Parasympathetic
C. Somatic
D. Spinal cord

Scanned by CamScanner

94. The Nipah virus outbreak is first detected in
A. Goa
B. Kerala
C. Odisha
D. Tamil Nadu

95. India's heaviest satellite GSAT-11 was launched from
A. Odisha
B. Andhra Pradesh
C. Russia
D. French Guiana

96. Rods and cones are receptors found in the
A. Skin
B. Ear
C. Eyes
D. Tongue

97. _____ is appointed as the new Governor of the Reserve Bank of India
A. Shaktikanta Das
B. Amitabh Kant
C. Nripendra Misra
D. Hasmukh Adhia

98. Introversion – extroversion was first proposed by
A. Eysenck
B. Freud
C. Adler
D. Jung

99. Modeling is a key concept proposed by
A. Bandura
B. Pavlov
C. Frankl
D. Skinner

100. Conversion disorders often appear in
A. childhood
B. adolescence
C. young adulthood
D. old age

Scanned by CamScanner
